Operator Comment: The pipeline riser as shown in the inspection photos does not belong to TEP Rocky Mountain. TEP has confirmed that Orion Energy was the last known owner / operator of this pipeline and riser. Orion had previously sold gas into TEP's meter run that was located at the HM 21-34 well pad, but this practice was discontinued when TEP P&A'd its well at this location. Orion Energy (or their successors) is responsible for removing any pipelines, risers, and associated equipment that they owned and operated.

TEP will re-seed the HM 21-34 location this coming fall (September thru October 2025) to improve both the diversity and density of the vegetative cover at this location.
