

**Operator: EXTRACTION OIL & GAS INC**

**Location Name: STATE A-61S66W 36SWSE**

**Loc ID: 319795**

**Inspection: 718600607**

## Form 4 Doc # 404293783

### Exhibit A

**CA:** This location and access road consist primarily of undesirable weeds such as russian thistle and field bindweed. There is very little establishment of desirable vegetation. It appears that reclamation was conducted in April of 2024 for this location. See attached pictures.

Due to lack of desirable vegetation establishment, ECMC is requiring soil sampling. Operator shall take samples along the access road and location, and background reference samples for comparison. Operator shall take discrete samples at six (6) inches intervals to a minimum depth of two (2) feet. See ECMC Comments Section for details on analytics. Comply with Rule 1004 to conduct additional reclamation. Control weeds on location.

For soil samples, submit results via Form 4 Sundry Notice, no later than two weeks after receiving results. Please check the "route to the area reclamation specialist box" in the reclamation section. Soil samples shall be overlaid on an aerial map depicting where soil sample locations and reference samples were taken.

**CA Resolution:** Operator has filed Form 4 Doc # 404293783 in order to comply with Rule 1004.
