INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This Form 27S is being submitted as a quarterly update; no work was conducted during the last quarter. Site assessment activities are planned to be conducted in the next quarter per approved Form 27S (Document #404048034).

Initial site assessment was conducted on 11/15/2024. Five soil samples were collected at the former tank battery; wall samples at 1.5' bgs and the floor sample at 3' bgs. Additionally, 4 background samples from 2 locations at 1.5' and 3' bgs were collected. Soil samples show exceedances for pH and SAR. All samples show that Arsenic exceeds Table 915-1; background samples indicate that the Arsenic Local Clean-Up Level is 7.7 mg/kg (1.25 * 6.16 mg/kg).

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Additional samples will be collected to delineate the pH, SAR, and Barium exceedances per approved Form 27S (Document #404048034).

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during facility decommissioning activities, a minimum of one grab sample will be collected as soon as practical. Groundwater sample(s) will be analyzed for Table 915-1 Groundwater Inorganic Parameters (total dissolved solids, sulfate, chlorides) and organic compounds in water.

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):
