Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

PROJECT, PURPOSE & SITE INFORMATION

PROJECT INFORMATION

Remediation Project #: 34243 Initial Form 27 Document #: 403528836

PURPOSE INFORMATION

- Rule 913.c.(1): Pit or Cuttings Trench closure.
- Rule 913.c.(2): Buried or partially buried vessel closure, which will be by removal.
- Rule 913.c.(3): Remediation of Spill and Releases pursuant to Rule 912.
- Rule 913.c.(4): Land treatment of Oily Waste pursuant to Rule 905.e.
- Rule 913.c.(5): Closure of Centralized E&P Waste Management Facilities pursuant to Rule 907.h.
- Rule 913.c.(6): Remediation of impacted Groundwater pursuant to Rule 915.e.(3).D, and the contaminant concentrations in Table 915-1.
- Rule 913.c.(7): Investigation and remediation of natural gas in soil or Groundwater.
- Rule 913.c.(8): When requested by the Director due to any potential risk to soil, Groundwater, or surface water.
- Rule 913.c.(9): Decommissioning of Oil and Gas Facilities.
- Rule 913.g: Changes of Operator.
- Rule 915.b: Request to leave elevated inorganics in situ.
- Other: \_\_\_\_\_

## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	GROUNDWATER	NA	Lab Analysis and Field Screening
Yes	SOILS	Refer to ECMC Doc. No. 403827428	Lab Analysis and Field Screening

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A site investigation was conducted pursuant to ECMC Rule 911 at the WIEDEMANT5N-R66W-S5 L01 Facility and Tank Battery location. On 05/10/2024, the tank battery was decommissioned in accordance with ECMC rules. Laboratory soil samples were collected beneath the above ground storage tanks (AST01-AST04) and beneath the the separator risers for the dumplines (SEP01-DL & SEP02-DL) and the flowlines (SEP01-FL & SEP02-FL). Additionally, field screening samples were collected beneath the flares (FLARE01-FLARE03) and meter house (MH01).

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Sampling was conducted as described in the Initial Action Summary of this Form 27. Soil samples were analyzed by a certified laboratory for the full extent of Table 915-1, including but not limited to: TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons) organic compounds in soil per ECMC Table 915-1, and EC, SAR, pH, metals, and boron. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Groundwater was encountered adjacent to the separator dumpline riser and a grab confirmation groundwater sample was collected and analyzed for all organic and inorganic compounds per ECMC Table 915-1.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Visual inspection at the tank battery area occurred during abandonment activities. Field personnel field screened all disturbed areas using visual and olfactory senses to determine if laboratory confirmation sampling was required. A detailed summary of decommissioning activities, including field notes, site photos, figures, and laboratory analytical results, was attached to a previous Form 27 (ECMC Document # 403827428).

Please note, no partially-buried produced water vessel was present at the time of decommissioning; therefore, no soil samples were collected. Based on a desktop review of this location, the produced water vessel was removed in 2021.

# SITE INVESTIGATION REPORT

## SAMPLE SUMMARY

**Soil**

Number of soil samples collected 10  
 Number of soil samples exceeding 915-1 8  
 Was the areal and vertical extent of soil contamination delineated? No  
 Approximate areal extent (square feet) 500

**NA / ND**

-- Highest concentration of TPH (mg/kg) 58.9  
 -- Highest concentration of SAR 0.52  
 BTEX > 915-1 Yes  
 Vertical Extent > 915-1 (in feet) 4

**Groundwater**

Number of groundwater samples collected 1  
 Was extent of groundwater contaminated delineated? No  
 Depth to groundwater (below ground surface, in feet) 4  
 Number of groundwater monitoring wells installed 0  
 Number of groundwater samples exceeding 915-1 1

-- Highest concentration of Benzene (µg/l) 5  
 -- Highest concentration of Toluene (µg/l) 1.9  
 ND Highest concentration of Ethylbenzene (µg/l) \_\_\_\_\_  
 -- Highest concentration of Xylene (µg/l) 9.8  
 NA Highest concentration of Methane (mg/l) \_\_\_\_\_

**Surface Water**

0 Number of surface water samples collected  
 \_\_\_\_\_ Number of surface water samples exceeding 915-1  
 If surface water is impacted, other agency notification may be required.

**OTHER INVESTIGATION INFORMATION**

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Three background soil samples were collected from one discrete soil boring location (BKG01) adjacent to the tank battery at depths ranging between 0.5 and 4 feet below ground surface and were analyzed for metals in soil per ECMC Table 915-1, pH, SAR, and EC. The background concentration of pH was observed to be 8.03. The maximum background concentration with a 1.25x multiplier applied for arsenic, barium and cadmium were calculated to be 4.85 mg/kg, 114 mg/kg and 0.286 mg/kg, respectively. All arsenic concentrations observed during decommissioning were below background levels.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) \_\_\_\_\_ Volume of liquid waste (barrels) \_\_\_\_\_

Is further site investigation required?

A supplemental site investigation (SSI) will be completed to vertically and horizontally delineate the organic compound exceedances observed at AST04@0-6", DL01-01@3', SEP01-DL@4', SEP02-DL@3', & SEP02-DL@4' during decommissioning. Concurrently with the SSI, additional background samples will be collected to determine if pH, barium, and cadmium concentrations observed are attributed to native soil conditions. Soil and groundwater samples will be collected and analyzed for the full Table 915-1 constituents list. An additional decommissioning soil sample will be collected adjacent to the former partially buried produced water vessel location, from proposed soil boring location SB09 at 2.5 feet. A proposed SSI map is attached to this Form 27. The SSI and decommissioning sampling will be completed in accordance with the proposed implementation schedule, and the results of the SSI will be submitted on a subsequent Form 27.

**REMEDIAL ACTION PLAN**

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

**SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

Organic compound exceedances recorded during initial decommissioning activities will be removed via mechanical excavation activities.

**REMEDIATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

A supplemental site investigation (SSI) will be completed to vertically and horizontally delineate the organic compound exceedances observed at AST04@0-6", DL01-01@3', SEP01-DL@4', SEP02-DL@3', & SEP02-DL@4' during decommissioning. Concurrently with the SSI, additional background samples will be collected to determine if pH, barium, and cadmium concentrations observed are attributed to native soil conditions. Soil and groundwater samples will be collected and analyzed for the full Table 915-1 constituents list. An additional decommissioning soil sample will be collected adjacent to the former partially buried produced water vessel location, from proposed soil boring location SB09 at 2.5 feet. A proposed SSI map is attached to this Form 27. The SSI will be completed in accordance with the attached proposed site investigation map, and proposed sampling plan outlined in the Site Investigation Report section of this Form 27.

Following the completion of the SSI, source mass removal activities will be completed to remove remaining hydrocarbon impacted material. Confirmation soil samples will be collected from the base and sidewalls of each final excavation extent and submitted for laboratory analysis of the full ECMC Table 915-1 analytical suite. Field activities and analytical results will be summarized in a subsequent Supplemental Form 27.

**GROUNDWATER MONITORING**

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Following source mass removal activities, monitoring wells will be installed within and surrounding the resulting excavation extents to monitor dissolved-phase organic compounds and to establish a point of compliance.

# REMEDIATION PROGRESS UPDATE

## PERIODIC REPORTING

### Approved Reporting Schedule:

Quarterly     Semi-Annually     Annually     Other

### Request Alternative Reporting Schedule:

Semi-Annually     Annually     Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

**Report Type:**     Groundwater Monitoring     Land Treatment Progress Report     O&M Report

Other 2Q25 Timeline Update & Supplemental Site Investigation Proposal

## Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Noble intends to directly address the costs of remediation at the locations as part of our asset retirement obligation process and operations. Noble has general liability insurance (policy MWZZ 316714) and financial assurance in compliance with ECMC rules. Records are available on the ECMC's website. Records are available on the ECMC's website. The cost for remediation is an estimate only, costs may change upwards or downward based on site-specific information. Noble makes no representation or guarantees as to the accuracy of the estimate.

Operator anticipates the remaining cost for this project to be: \$ 50000

## WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards

E&P waste (solid) description

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility:

Volume of E&P Waste (liquid) in barrels

E&P waste (liquid) description

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility:

## REMEDIATION COMPLETION REPORT

### REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

Compliant with Rule 913.h.(1).

Compliant with Rule 913.h.(2).

Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards?

Does the previous reply indicate consideration of background concentrations?

Does Groundwater meet Table 915-1 standards? \_\_\_\_\_

Is additional groundwater monitoring to be conducted? \_\_\_\_\_

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeded program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Reclamation will be in accordance with ECMC 1000 Series Rules.

Is the described reclamation complete? Yes \_\_\_\_\_

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim  Final

Did the Surface Owner provide the seed mix? \_\_\_\_\_

If YES, does the seed mix comply with local soil conservation district recommendations? \_\_\_\_\_

Did the local soil conservation district provide the seed mix? \_\_\_\_\_

### SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 05/10/2024

Proposed date of completion of Reclamation. 03/05/2027

## IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

### PRIOR DATES

Date of Surface Owner notification/consultation, if required. 08/24/2023

Actual Spill or Release date, or date of discovery. 06/18/2024

### SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 05/10/2024

Proposed site investigation commencement. 09/02/2025

Proposed completion of site investigation. 09/05/2025

### REMEDIAL ACTION DATES

Proposed start date of Remediation. 09/05/2025

Proposed date of completion of Remediation. 09/05/2026

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

'Proposed completion of site investigation' date is being updated to reflect the schedule to complete the supplemental site investigation (SSI). The SSI is tentatively scheduled for 09/02/2025. The ECMC will be updated on a subsequent Form 27 with the results of the SSI.

**OPERATOR COMMENT**

This Form 27 is being submitted as a Second Quarter 2025 timeline update for the former Wiedeman 25-5 Tank Battery.

A supplemental site investigation (SSI) will be completed to vertically and horizontally delineate the organic compound exceedances observed during decommissioning. Concurrently with the SSI, additional background samples will be collected to determine if pH, barium, and cadmium concentrations observed are attributed to native soil conditions. An additional decommissioning soil sample will be collected adjacent to the former partially buried produced water vessel location. A proposed SSI map is attached to this Form 27. The SSI will be completed in accordance with the work plan proposed on the previous Supplemental Form 27 (ECMC Document # 403930473), which was approved on 09/26/2024.

Following the completion of the SSI, source mass removal activities will be completed to remove remaining hydrocarbon impacted material. Confirmation soil samples will be collected from the base and sidewalls of each final excavation extent and submitted for laboratory analysis of the full ECMC Table 915-1 analytical suite. Following source mass removal activities, monitoring wells will be installed within and surrounding the resulting excavation extents.

Quarterly reporting will continue until the remediation criteria for this project is achieved. The SSI is tentatively scheduled for 09/02/2025. The ECMC will be updated with the results of the SSI on a subsequent Form 27.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Signed: Eric Vonde
