Jason,

The 3-phase power line that currently is on section 25, is also being used by another consumer's stock well a span south of the AU 132 power bank. And this power line is on landowner property which has a signed easement with KC Electric. The only way we retire any powerline is with a signed removal of service affidavit from the current landowner stating they no longer want this on their property. The signed affidavit that Citation receives is just stating that they no longer need the electrical service at that location. If you have any question, feel free to contact me.

Thank you,

Casey Hyle
