ECMC Field Inspection Report Summary

This is an environmental inspection to determine progress on Spill ID 482194 and Remediation Project # 25606. Any corrective actions from previous inspections, NOAVs and/or conditions of approval from previous forms that have not been fully addressed are still applicable. There were no operator or contract environmental personnel on location; the Local Government Designee (LGD) for the Town of Frederick was on location at the time of this inspection. Photos attached to document site conditions.

Spill Name: Stromquist 4A

Spill ID: 482194

Remediation Project #: 25606

Reported Date of Discovery: 05/15/2022

Date of Inspection: 09/11/2025

Weather: Partly cloudy, 80-78°F

Per ECMC complaint Document # 200451581, a spill was discovered daylighting in close proximity to the subject Spill and Remediation Project; Spill ID 491349 was assigned to the newly discovered Spill which will be addressed in a separate Field Inspection Report (Document # 717100377).

The ECMC complaint notes that Spill ID 484760 and Remediation Project # 37087 are out of compliance with ECMC remediation and reporting requirements. Spill ID 484760 and Remediation Project # 37087 are located approximately 0.9 miles southeast and do not appear to be associated with the subject location. However, an excavation associated with Spill ID 482194 and Remediation Project # 25606 is located approximately 165 ft east of the newly discovered Spill. ECMC Staff and the LGD for the Town of Frederick noted the excavation associated with Spill ID 482194 and Remediation Project # 25606 at the time of this inspection. The excavation at the spill location remains open.

Spill is located within or in close proximity to:

-Within the Town of Frederick

-Idaho Creek (~200 ft)

-Riverine wetland (~200 ft)

-Freshwater Pond (<100 ft)

-Within buffers for the following CPW High Priority Habitats: Bald Eagle Active Nest Site Half Mile & Bald Eagle Roost Site

-FEMA 100-Year Effective (2020) Floodplain (~100 ft)

-Residential Building Units (<150 ft)

Current site status:

-The excavation at the spill location remains open. Weeds obscure visibility of the excavation base and sidewalls; however, groundwater at the base of the excavation has previously been documented.

-No work appears to have been performed on this excavation since the previous Field Inspection Report (Document # 697602103).

Impacts have been documented and appear to remain in situ.

-Barbed wire fencing surrounds the excavation.

-A network of monitoring wells completed as stickups was observed on location.

See attached corrective actions.

Spill/Remediation:

Comment: Remediation Project # 25606 was created to address the ongoing remediation associated with Spill ID 482194. The excavation at the spill location remains open. Impacts have been documented and appear to remain in situ. A network of monitoring wells completed as stickups was observed on location. See attached for additional information regarding remediation status.

Quarterly reporting is required under Remediation Project # 25606; the last Form 27 for this project was submitted 06/21/2024 (Document # 403817048).

Corrective Action: In accordance with Rule 913.e.(3), Operator will adopt and maintain a quarterly reporting schedule (90 days). Operator shall provide an updated Form 27 for Remediation Project # 25606. CA due date backlisted to the date an updated Form 27 was due. Date: 09/09/2024
