Environmental

Spill/Remediation:

Comment: This is a follow up environmental inspection for Spill ID 480894 and Remediation Project 21723. At the time of inspection an open excavation was present on the south side of the tank battery facility within the secondary containment. Impacted soils were visible at the base of the three tanks located within the containment area. Form 27-S document no. 404294954 was received on 07/25/2025 providing the following Operator Comment:

This Form 27 has been submitted as a quarterly update of activities performed at the King Pyles 4 Spill. This project was recently transferred to management under a different remediation consultant for completion of this project. Entrada Consulting Group, is currently in process of discovery for all documentation of actions completed under this Remediation Project. Updated project documentation, status, and/or updated remediation strategies will be provided on a subsequent Form 27. Per records review, it appears that quarterly reporting for 2nd Quarter, 2025 was not completed. Corrective actions to prevent reoccurrence include a Form submittal tracking and notification system to alert the Operator of reporting deadlines.

Operator shall continue Quarterly Reporting until the Site Assessment is completed and the remediation area demonstrates Compliance with Table 915-1 Standards.

Corrective Action: **In accordance with Rule 913.e.(3), Operator will adopt a quarterly reporting schedule (every 90 days).** Date: 10/23/2025
