Operator Comments:

KMOG is requesting approval to install a permanent 15hp instrument air compressor skid on the Barclay Tank Battery 3N-27HZ (location 425656). This installation will reduce emissions and the environmental impact of the facility by providing instrument air, instead of natural gas, to operate pneumatically controlled valves.

The instrument air skid installed at this location will provide instrument air to operate the facility equipment for the following wells: Barclay 3N-27HZ, Barclay 29C-27HZ (location 327117), Barclay 35-27, Barclay 4C-27HZ, Barclay 4N-27HZ and Barclay 29N-27HZ (location 336176).

KMOG will repurpose an existing flowline from the Barclay Tank Battery 3N-27HZ facility to the Barclay 4C-27HZ well pad to provide instrument air, replacing natural gas, to operate the pneumatically controlled wellhead equipment for the following wells: Barclay 35-27, Barclay 4C-27HZ, Barclay 4N-27HZ and Barclay 29N-27HZ (location 336176).

Additionally, KMOG is requesting approval to install a small permanent micro instrument air skid, housed in a cabinet measuring approximately 3'x5' on the Barclay 3N-27HZ well pad (location 327117). The air skid will provide instrument air, replacing natural gas, to operate the pneumatically controlled wellhead equipment for the following wells: Barclay 3N-27HZ, Barclay 29C-27HZ.

This equipment is not expected to result in additional traffic, light, or noise impacts to surrounding stakeholders.

Please see attachments for details.

KMOG plans to install the new equipment on November 3, 2025.
