REPAIR WELL <input type="checkbox"/>	CHANGE PLANS <input type="checkbox"/>	(Other) <input checked="" type="checkbox"/> Conversion to Water Inj.	

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

McCallum Unit No. 10 was converted to water injection subsequent to the filing of U.S.G.S. form 9-331 dated 8-18-64.

9-20-64 injection started at average rate of 328 BHPD. Injection has been continuous since 8-18-64. A total of 70,426 barrels of water had been injected to April 1, 1965, which is an average daily water injection of 365 barrels. The injected volume is not yet large enough to effect a reduction of producing gas oil ratio from Wells 24, 26, 28, 30 or 32.

It is preferred to maintain this injection project as experimental as was proposed in the form filed 8-18-64.
