WELL ABANDONMENT REPORT

This form is to be submitted as an Intent to Abandon whenever an abandonment is planned on a borehole. After the abandonment is complete, this form shall again be submitted as a Subsequent Report of the actual work completed. The approved intent shall be valid for six months after the approval date, after that period, a new intent will be required. Attachments required with the Intent to Abandon are wellbore diagrams of the current configuration and the proposed configuration with plugs set. A Subsequent Report of Abandonment shall indicate the actual work completed. Attachments required with a Subsequent Report are a wellbore diagram showing plugs that were set and casing remaining in the hole, the job summaries from all plugging contractors used, including wireline and cementing (third party verification) and any logs that may have been run during abandonment.

ECMC Operator Number: 8960 Contact Name: Adam Conry
 Name of Operator: BONANZA CREEK ENERGY OPERATING COMPANY Phone: (303) 883-3351
 Address: 555 17TH STREET SUITE 3700 Fax: _____

Perforate and squeeze at _____ ft. with _____ sacks. Leave at least 100 ft. in casing _____ CICR Depth

(Cast Iron Cement Retainer Depth)

Set 219 sacks half in. half out surface casing from 575 ft. to 0 ft. Plug Tagged:
Set 15 sacks at surface
Cut four feet below ground level, weld on plate Above Ground Dry-Hole Marker: Yes No
Set _____ sacks in rat hole Set _____ sacks in mouse hole

Additional Plugging Information for Subsequent Report Only

Casing Recovered: 2400 ft. of 4+1/2 inch casing Number of Days from Setting Surface Plug to Capping or Sealing the Well: 96
Surface Plug Setting Date: 04/23/2025 Cut and Cap Date: 07/28/2025

*Wireline Contractor: Surefire *Cementing Contractor: Axis

Type of Cement and Additives Used: G Neat

Flowline/Pipeline has been abandoned per Rule 1105 Yes No

Technical Detail/Comments:

See Form 27 Doc# 404144609 (WH cut/cap).
 The flowlines have been abandoned on the Post-AB Form 42 Doc#404318272.
 A Bradenhead test was performed before plugging this well. Pressures were present, but there was no flow, so no sample could be taken. Form 17 submitted with results, Doc #404160654.
 Form 42 was submitted prior to plugging operations, Form 42 Doc #404160981. Form 42 was submitted prior to MIRU for plugging operations, Form 42 Doc #404160980.
 Prior to placing cement above Upper Pierre 1403', operator waited a sufficient amount of time to confirm static conditions. There was no pressure or fluid migration.
 The plug was cemented to surface with 219 sacks of cement from 575' - surface with an additional 15 sks of cement at surface.
 At least 100' of cement was left in the wellbore for each plug.
 After cut prior to cap, Operator verified isolation by a 15 minute bubble test and no flow was observed.
 This form 6-SRA addresses all COA's from the Form 6-NOIA.
 Venting health and safety precautions were taken to avoid nuisance and or hazards to the public.
 Operator used secondary containment for all tanks and other liquid containment.

- Attached to this form:
1. Wireline tickets
 2. Cement tickets
 3. Operations summary
 4. Final P&A WBD
 5. CBL

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Engineer	Cut and Cap >90 days Operator response: The well was cut and capped 96 days after the last surface plug was set. Upon review, it was determined that Civitas consultants submitted a Form 27 Supplemental (Doc #404279091) on July 14th, 2025 which was prior to the 90-day deadline (July 22, 2025), documenting the delay due to wildlife nesting.	10/01/2025
