Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 07/24/2025, the potential presence of impacted material(s) was identified via hydrocarbon odor, and hydrocarbon staining during decommissioning activities at the Timmerman 14-13 wellhead, samples: WH01 & WH01-E, located at the wellhead in the same excavation. Final laboratory analytical data indicated a historical release was discovered at the Timmerman 14-13 decommissioned wellhead. CS-1, exceeded ECMC Table 915 standards for TPH at 657 mg/kg. WH01, WH01-E and CS-1 after review and discussion are being considered 1 release due to the close proximity to each other and that the only source area near by is the wellhead. The volume of potentially impacted material(s) is not currently known. Groundwater was not encountered during decommissioning activities. The supplemental Form 27 has been submitted for remediation number 41489 detailing the remedial site plan, document number: 404292965.

## CORRECTIVE ACTIONS

#1 Supplemental Report Date: 10/17/2025

Root Cause of Spill/Release Unknown (Historical)

Other (specify) \_\_\_\_\_

Type of Equipment at Point of Spill/Release: Wellhead Line

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

The potential presence of impacted material(s) was identified during flowline decommissioning activities at the wellhead. The volume of potentially impacted material(s) is not currently known. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

Noble conducts routine AVO inspections of all oil and gas facilities in order to identify and mitigate potential releases. Further, this facility is no longer active and is in the process of being decommissioned. The wellhead has been taken out of service, and there is no longer a possibility of a release originating from this infrastructure.
