Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911, a site investigation was conducted by a Chevron business partner on 09/09/2024 pertaining to the Hagemeister USX AA07-01 wellhead cut and cap. The wellhead was cut and capped per ECMC rules.

Pursuant to ECMC Rule 911, a site investigation was conducted on 10/30/2024 pertaining to the Hagemeister USX AA07-01 flowline removal. The entire length of the flowline was abandoned-in-place per landowner agreement. The Form 44 document number associated with the flowline abandonment (#404050667) can be found in the Related Forms section of this Form 27.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

A grab soil sample was collected at the base of the excavation (WH01@6') and the area showing the highest degree of impact during field screening activities at the wellhead excavation (WH01-N@4'). Additionally, soil samples were field screened at the N-E-S-W sides of the wellhead (WH01-N@4', FLR01@4', WH01-S@4', WH01-W@4'). Soil samples were taken at the start and endpoint of the flowline where the area exists (FL01R-W@4'). Soil samples were analyzed by a certified laboratory for the full extent of Table 915-1, including but not limited to: TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons) organic compounds in soil per ECMC Table 915-1, and EC, SAR, pH, metals, and boron. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during the site investigation a grab groundwater sample will be collected and analyzed for all organic and inorganic compounds per ECMC Table 915-1.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Visual inspection of the wellhead and flowline areas occurred during abandonment activities. Field personnel field screened all disturbed areas using visual and olfactory senses to determine if laboratory confirmation sampling is required. A detailed summary of flowline and wellhead decommissioning activities, including field notes, site photos, figures, and laboratory analytical results, was attached to a previous Supplemental Form 27 (ECMC Document #404170715).

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

On 10/30/2024, one background soil sample was collected from one discrete location (BKG01) adjacent to the flowline. On 10/30/2024, three background soil samples were collected from one discrete location (BKG01) during decommissioning of the associated Hagemeister USX AA-66N63W 7NWNE (REM #36558; Reported under ECMC Doc #403975605) Tank Battery. On 02/06/2025, twenty backgrounds were collected from five discrete locations (BKG02-BKG06) during supplemental site investigation (SSI) activities at the associated Hagemeister USX AA-66N63W 7NWNE Tank Battery (REM #36558; reported under ECMC Doc #404196185). Background soil samples were collected at depths ranging from 0.5 to 15 feet below ground surface (ft bgs.). All background samples were analyzed for metals in soil per ECMC Table 915-1, pH, SAR, EC, and boron.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) \_\_\_\_\_ Volume of liquid waste (barrels) \_\_\_\_\_

Is further site investigation required?

Based on the analytical results collected during decommissioning, a SSI will be completed to vertically and horizontally delineate the EC exceedances observed during decommissioning, to collect analytical soil samples (FL01-02, FL01-06, FL01-07, FL01-09, FL01-11, FL01-14, FL01-15, and FL01-17), and to collect field screen samples (FL01-01, FL01-03, FL01-04, FL01-05, FL01-08, FL01-10, FL01-12, FL01-13, FL01-16, FL01-18, and FL01-19) along the flowline path as shown on the proposed SSI map attached to a previous Form 27 (ECMC Document #404170715). All proposed flowline sample locations were selected based on the approved sampling map attached to the Form 27 Initial (ECMC Document #403883827). During the SSI, soil samples will be collected and analyzed for full ECMC Table 915-1 constituents.

Concurrently with the SSI, additional background samples will be collected to determine if EC is attributed to native conditions at the site. The SSI and flowline sampling will be completed in accordance with the proposed implementation schedule, and the results will be submitted on a subsequent Form 27.

## REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

### SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

No impacted material caused by oil and gas has been identified at this time.

### REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Decommissioning analytical results indicated that organic compound concentrations were in compliance with the applicable ECMC regulatory standards in all soil sample locations. Based on the remaining analytes, SSI will be completed to vertically and horizontally delineate the EC exceedances observed at sample locations FL01-W@4', WH01-N@4', and FLR01@4' during decommissioning, in accordance with the proposed site investigation map attached to the previous Form 27 (ECMC Document #404170715), and proposed sampling plan outlined in the Site Investigation Report section of this Form 27.

Concurrently with the SSI, analytical soil samples will be collected along the flowline path (FL01-02, FL01-06, FL01-07, FL01-09, FL01-11, FL01-14, FL01-15, and FL01-17) and field screen samples will be collected along the flowline path (FL01-01, FL01-03, FL01-04, FL01-05, FL01-08, FL01-10, FL01-12, FL01-13, FL01-16, FL01-18, and FL01-19) as shown on the proposed SSI map attached to the previous Form 27 (ECMC Document #404170715). All proposed flowline sample locations were selected based on the approved sampling map attached to the Form 27 Initial (ECMC Document #403883827). Analytical samples will be submitted for full ECMC Table 915-1 analysis.

## Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Noble intends to directly address the costs of remediation at the locations as part of our asset retirement obligation process and operations. Noble has general liability insurance (policy MWZZ316714 and MWZX316724) and financial assurance in compliance with ECMC rules. Records are available on the ECMC's website. The cost for remediation is an estimate only, costs may change upwards or downward based on site-specific information. Noble makes no representation or guarantees as to the accuracy of the estimate.

Operator anticipates the remaining cost for this project to be: \$ 50000

### REMEDIAL ACTION DATES

Proposed start date of Remediation. 11/01/2025

Proposed date of completion of Remediation. 05/01/2026

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

The implementation schedule has not changed from the schedule proposed in previous Form 27 #404170715. The proposed site investigation is tentatively scheduled for commencement on 11/01/2025.

**OPERATOR COMMENT**

This Form 27 is being submitted as a 4Q25 timeline update for the proposed site investigation at the Hagemeister USX AA 07-01 wellhead and flowline.

The implementation schedule has not changed from the schedule proposed in previous Form 27 #404170715. The proposed site investigation is tentatively scheduled for commencement on 11/01/2025. The ECMC will be notified of any updates to the implementation schedule in a subsequent Form 27.

The results of the proposed supplemental site investigation will be submitted on a subsequent Form 27. Quarterly reporting will be conducted until closure criteria are achieved for the remediation project.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
