

OIL & GAS  
CONSERVATION COMMISSION

October 26, 1961

Mr. John Nicklas  
Fort Morgan, Colorado

Dear Sir:

RE: #1 Nicklas, NW NW Sec. <sup>30</sup>~~33~~  
9N-55W Logan Co., Colorado

As you know the pulling of the above well was completed a short time ago by Donnelly Casing Company. We were advised by Mr. Donnelly that it was your wish to keep this hole open for your use as a water well.

The Oil & Gas Commission advises that you must secure permission from the state engineer's office in order to keep this well open.

They are sending you the necessary forms to be used in securing your permit. Your promptness in completing their requirements will be appreciated.

Yours very truly,

S. D. JOHNSON
