OIL & GAS  
CONSERVATION COMMISSION

Mr. Ed Pivonka  
Stoneham, Colorado

Re: #1 Nicklas, NW NW Sec.30-9N-55W  
Logan County, Colorado

Dear Mr. Pivonka:

The above well was the old abandoned well drilled several years ago by Tom Vessels. In October 1961, we had Donnelly Casing Pulling Company pull the casing; however, he did not plug the well because it was Mr. Nicklas' wish that the hole be left open for use as a water well.

In order to keep the well open, Mr. Nicklas must obtain permission from the Colorado Oil and Gas Conservation Commission. The necessary forms were sent to Mr. Nicklas several months ago; however, nothing has been done.

We would appreciate your help in getting this taken care of promptly, since the commission must look to us for plugging the well in the near future; unless Mr. Nicklas still wishes to keep the well for water purposes.

Yours very truly

S. D. JOHNSON
