Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Please see documents associated with ECMC Remediation # 24100 for details on work completed prior to the second quarter of 2024.

As of May 28, 2025, HRL personnel has mobilized to the Site on seven (7) occasions to complete operations and maintenance (O&M) activities on the Soil Vapor Extraction (SVE) system. When site conditions allowed, O&M activities were completed on a weekly basis for the first month of SVE operations. Subsequent O&M activities were completed on a monthly basis. SVE parameters, photoionization (PID) readings, and emissions samples were collected during each site visit to determine the volume of hydrocarbons removed. Vapor samples were submitted to Pace Analytical for analyses using EPA Method M18-MOD. Please see the attached files for sampling dates, summaries, system performance tables, and lab analytical data.
