Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR INFORMATION

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
No	GROUNDWATER	Refer to Tables and Figures	Lab Analysis and Field Screening
Yes	SOILS	Refer to Tables and Figures	Lab Analysis and Field Screening

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911, a site investigation was conducted at the REINICK T4N-R64W-S9 L03 Tank Battery. On 7/23/2024, the tank battery was decommissioned in accordance with ECMC rules. The on-site dump lines located between the separator and the tank battery were removed. Laboratory soil samples were collected from beneath the above ground storage tanks (AST01 through AST04@0-6"), at the risers for the dumpline and flowline of any separator (SEP01-DL@5', SEP02-DL@5', SEP01-FL@5', SEP02-FL@5'), and produced water vaults (PWV01-B@5', PWV01-W@2.5', PWV02-B@5', PWV02-W@2.5', PWV03-B@5', PWV03-E@2.5', PWV04-B@5' and PWV04-S@2.5'). All samples were field screened prior to lab analysis. Additionally, field screening samples were collected beneath the emission control devices (FLARE01 through FLARE03@0-6"), meter houses (MH01 through MH03@0-6"), land owner infrastructure marked on the Initial Form 27 Map (GS01 through GS06@0-6") unrelated to oil and gas production activities, vapor recovery unit (VRU@0-6") and automated solar panel (AUTO@0-6"). Additionally, one groundwater sample was collected from the produced water vault excavation (GW01) at five feet below ground surface.

Analytical results indicated that organic compound concentrations were below ECMC Table 915-1 standards in all confirmation soil and groundwater samples collected.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Soil samples were collected as described in the Initial Action Summary of this Form 27, per the approved work plan in the Initial Form 27 # 403676582. Soil samples were analyzed by a certified laboratory using approved ECMC laboratory analysis methods for the full extent of Table 915-1, including but not limited to: TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons) organic compounds in soil per ECMC Table 915-1, EC, SAR, pH, metals, and boron.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Groundwater was encountered during the initial site investigation. Groundwater sample GW01 was collected on 07/23/2024 at five feet below ground surface from the produced water vault excavation. Sample GW01 was submitted for laboratory analysis of the ECMC Table 915-1 Organic Compounds in Groundwater; this sample analysis includes, but is not limited to BTEX, naphthalene, 1,2,4-trimethylbenzene (TMB), and 1,3,5-TMB by EPA Method 8260. No monitoring wells have been installed to date.

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

Visual inspection at the tank battery area occurred during decommissioning activities. Field personnel screened all disturbed areas using visual and olfactory senses to determine if additional laboratory sampling was required. A detailed summary of decommissioning activities, including field notes, site photos, figures, and laboratory analytical results, was attached to Form 27 # 404053706.

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 16
Number of soil samples exceeding 915-1 3
Was the areal and vertical extent of soil contamination delineated? No
Approximate areal extent (square feet) 300

NA / ND

ND Highest concentration of TPH (mg/kg) _____
-- Highest concentration of SAR 1.74
BTEX > 915-1 No
Vertical Extent > 915-1 (in feet) 5

Groundwater

Number of groundwater samples collected 1
Was extent of groundwater contaminated delineated? Yes
Depth to groundwater (below ground surface, in feet) 5
Number of groundwater monitoring wells installed 0
Number of groundwater samples exceeding 915-1 0

ND Highest concentration of Benzene (µg/l) _____
ND Highest concentration of Toluene (µg/l) _____
ND Highest concentration of Ethylbenzene (µg/l) _____
ND Highest concentration of Xylene (µg/l) _____
ND Highest concentration of Methane (mg/l) _____

Surface Water

0 Number of surface water samples collected
 Number of surface water samples exceeding 915-1
If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

On 07/23/2024, four background soil samples were collected from one discrete soil boring location (BKG01) adjacent to the REINICK C-64N64W 9SENE Tank Battery at depths ranging between 0 feet and 5 feet below ground surface (ft bgs) and were analyzed for metals in soil per ECMC Table 915-1, pH, SAR, EC, and boron. Background sample lithology between the site and background locations were observed to be well graded sands. The maximum background concentration of pH was observed to be 8.50. The maximum background concentrations with a 1.25x multiplier applied for arsenic and cadmium were observed to be 3.56 mg/kg and 0.256 mg/kg, respectively.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) _____ Volume of liquid waste (barrels) _____

Is further site investigation required?

A supplemental site investigation (SSI) will be completed to collect five additional background samples (BKG02 - BKG06) to determine if pH, arsenic, and cadmium are attributed to native soil conditions at the site. The proposed background soil sampling locations are shown on the proposed site investigation map attached to Form 27 # 404186398. During the background site investigation, soil samples will be collected and analyzed for metals in soil per ECMC Table 915-1, pH, SAR, EC, and boron. The SSI will be completed in accordance with the proposed implementation schedule, and the results of the SSI will be submitted on a subsequent Form 27.

Additionally during the SSI, a groundwater sample will be re-collected in the location of GW01 (BH01). Laboratory groundwater samples will also be collected from background locations (BKG02 - BKG06) to establish inorganic background concentrations through temporary monitoring wells installed using a hand auger, and subsequently purged, sampled and abandoned as discussed in the Groundwater Monitoring section of this Form 27.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

No impacted material caused by oil and gas operations was identified at this time.

REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

A supplemental site investigation (SSI) will be completed to collect additional background samples to determine if the pH exceedance observed at SEP01-FL@5', the arsenic exceedance observed at SEP01-DL@5', and the cadmium exceedances observed at SEP01-DL@5' and SEP02-DL@5' during decommissioning are attributed to native soil conditions at the site. Five background samples (BKG02 - BKG06) will be collected topographically upgradient from the facility decommissioning sample locations. Additional SSI activities will be proposed (as applicable) on a future Form 27 if further investigation is required. The proposed background soil sampling locations are shown on the proposed site investigation map attached to Form 27 # 404186398. The background site investigation will be conducted per the proposed implementation schedule, and the results will be submitted in a subsequent Form 27.

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Groundwater was encountered and sampled during initial site investigation activities. One groundwater sample (GW01) was collected from the produced water vault excavation at five feet below ground surface from the former tank battery location and was submitted for laboratory analysis of BTEX, naphthalene, 1,2,4-trimethylbenzene (TMB), and 1,3,5-TMB by EPA Method 8260. Analytical results indicated organic compounds were undetected, and an investigation of background inorganics in groundwater will be completed. A groundwater sample will be re-collected in the location of GW01 (BH01) in order to monitor inorganic parameters. Laboratory groundwater samples will also be collected from background locations (BKG02 though BKG06) topographically up-gradient from GW01 to establish inorganic background concentrations at this site through temporary monitoring wells installed using a hand auger, and subsequently purged and sampled. Following sample collection, temporary wells will be abandoned. The results of the temporary monitoring well groundwater sampling will be submitted on a subsequent Form 27.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

Quarterly Semi-Annually Annually Other _____

Request Alternative Reporting Schedule:

Semi-Annually Annually Other _____

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: Groundwater Monitoring Land Treatment Progress Report O&M Report
 Other _____ Timeline Update

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).
If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Noble intends to directly address the costs of remediation at the locations as part of our asset retirement obligation process and operations. Noble has general liability insurance (policies MWZZ 316714 and MWZX316724) and financial assurance in compliance with ECMC rules. Records are available on the ECMC's website. The cost for remediation is an estimate only, costs may change upwards or downward based on site-specific information. Noble makes no representation or guarantees as to the accuracy of the estimate.

Operator anticipates the remaining cost for this project to be: \$ 50000 _____

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No _____

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards _____

E&P waste (solid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

Volume of E&P Waste (liquid) in barrels _____

E&P waste (liquid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No _____

If YES:

- Compliant with Rule 913.h.(1).
- Compliant with Rule 913.h.(2).
- Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? _____

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Reclamation will be in accordance with ECMC 1000 Series Rules.

Is the described reclamation complete? Yes _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 07/23/2024

Proposed date of completion of Reclamation. 11/17/2026

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 09/18/2023

Actual Spill or Release date, or date of discovery. _____

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 07/23/2024

Proposed site investigation commencement. 11/17/2025

Proposed completion of site investigation. 11/17/2025

REMEDIAL ACTION DATES

Proposed start date of Remediation. 11/17/2025

Proposed date of completion of Remediation. 05/17/2026

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

The implementation schedule was updated for the proposed site investigation at the Reinick C-64N64W 9SENE Tank Battery to reflect a change in the start work dates due to land access issues. The tentative start date for the proposed site investigation has been updated from 08/19/25 to 11/17/25. The ECMC will be notified of any updates to the implementation schedule in a subsequent Form 27.

OPERATOR COMMENT

This Form 27 is being submitted as a 4Q25 timeline update for the proposed supplemental site investigation (SSI) at the Reinick C-64N64W 9SENE Tank Battery.

The implementation schedule was updated for the proposed SSI at the Reinick C-64N64W 9SENE Tank Battery to reflect a change in the start work dates due to land access issues. The tentative start date for the proposed SSI has been updated from 08/19/25 to 11/17/25. The ECMC will be notified of any updates to the implementation schedule in a subsequent Form 27.

The results of the proposed background SSI and groundwater sampling for inorganics will be submitted on a subsequent Form 27. Per ECMC Rule 913.e., quarterly reporting will be conducted until closure criteria are achieved for the remediation project.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
