**General Comment:**

On 10/28/2025, NW Reclamation Specialist Emily Gaasche conducted a final reclamation inspection at SWN Production Company LLC's Walker 7-93-3/Pad 6 location in Moffatt County, Colorado.

It was observed in this inspection that reclamation has not been completed pursuant to 1004 requirements.

The following compliance issues were observed during this inspection:

- Access road has not been reclaimed
- Utility equipment remaining
- Signage remaining
- Weeds
- Stormwater (access road)

Refer to the Reclamation and COGCC Comments section of this report for additional details.

Refer to the photo-documentation attached to this report for additional details.

Any outstanding CA's from previous inspections remain applicable.

Conduct reclamation on the location/road in accordance with 1004 rules including, but not limited to: removal of utility equipment, removal of gravel, compaction alleviation, recontour/regrade and establish vegetation with total perennial, non-invasive uniform plant cover of at least 80% of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district.

Comply with Rule 1002.f and ensure erosion controls are implemented to stabilize the seeded soil.

Comply with Rules 1004.e and 606.c: Oil and Gas Locations will be kept free of all Undesirable Plant Species.

Ongoing stormwater and weed management required until Final Reclamation has passed.

Overall Final Reclamation **Fail** Well Release on Active Location  Multi-Well Location

**ECMC Comments**

Comment	User	Date
<p><b>RECLAMATION COMMENTS:</b> Pursuant to Form 6(s) #403143565, well API #05-081-07156 was plugged and abandoned on 05/24/2022. Form 4 #403798634 stating final reclamation complete was received by ECMC on 06/04/2024.</p> <p>The location is primarily composed of intermediate and crested wheatgrass. Scotch thistle, a List B noxious weed, is scattered in tertiary amounts throughout the location. It does not appear as though weeds have been managed in 2025. It was also observed that species planted do not reflect species within the adjacent undisturbed reference areas, or vegetation that existed pre-disturbance; records show surface owner approved of the mix.</p> <p>Resolution #403922785 states that signage has been removed from the location. This inspection observed that signage remains at the location and requires removal.</p> <p>Utility equipment that is no longer in use remains at the location. Resolution #403922785 states that utility equipment does not belong to the Operator. Utility equipment is associated with the O&amp;G Location for O&amp;G operations, and the corrective action requirements for removal remains applicable. It is the ECMC's expectation that SWN will coordinate with the equipment's owner for removal.</p> <p>The access road on the south end of the location has not been reclaimed in accordance with ECMC 1004 Rules. Gravel/compaction evident. Erosion, rilling and sediment migration is occurring on the road. Ongoing stormwater maintenance is required.</p> <p>Pursuant to Rule 1004.a, all debris, abandoned gathering line risers and flowline risers, and surface equipment shall be removed within three (3) months of plugging a well. All access roads to plugged and abandoned wells and associated production facilities shall be closed, graded and recontoured. Well locations, access roads and associated facilities shall be reclaimed. As applicable, compaction alleviation, restoration, and revegetation of well sites, associated production facilities, and access roads shall be performed to the same standards as established for interim reclamation under Rule 1003. All other equipment, supplies, weeds, rubbish, and other waste material shall be removed. All such reclamation work shall be completed within twelve (12) months on non-crop land after plugging a well or final closure of associated production facilities.</p>	gaaschee	11/04/2025
