Root Cause of Spill/Release Unknown (Historical)

Other (specify) _____

Type of Equipment at Point of Spill/Release: Wellhead Line

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

Historical impacts were discovered during flowline decommissioning activities along the flowline where the PID was the highest. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

Noble conducts routine AVO inspections of all oil and gas flowlines in order to identify and mitigate potential releases. Further, this flowline is no longer active and is in the process of being decommissioned. The flowline has been taken out of service and there is no longer a possibility of a release originating from this infrastructure.

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

- Basis for Closure:
- Corrective Actions Completed (documentation attached, check all that apply)
 - Horizontal and Vertical extents of impacts have been delineated.
 - Documentation of compliance with Table 915-1 is attached.
 - All E&P Waste has been properly treated or disposed.
 - Work proceeding under an approved Form 27 (Rule 912.c).
Form 27 Remediation Project No: 29328
 - SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

OPERATOR COMMENTS:

Operator was notified of this release on 10/23/2025, and acknowledges that this notification is not being submitted within 24 hours of the receipt of the results. When reviewing the project archives it was discovered that this release was not reported.

In addition to the release at FL01-E, the following releases are all located on the same Alexander Federal H4-2JI flowline but are not in the same excavation:

FL01-A, document number: 404407807

The lab data that was linked to this event was from 10/26/2023, before the lab reports were required to be secured. As Summit Scientific is no longer in business the operator was not able to requested a secured version of this lab report. Operator did conduct an in depth search in the files received by Summit to ensure a secured version of this report was not sent at a later date.

Operator has removed all lab data from this Form-19 and confirmation samples will be taken at this site during a site investigation and will be submitted on a form 27 linked to REM 29328.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
