**General Comment:**

On 10/29/2025, NW Reclamation Specialist Emily Gaasche conducted a final reclamation inspection at SWN Production Company LLC's Walker 7-93-3/Pad 2 location in Moffatt County, Colorado.

It was observed in this inspection that reclamation has not been completed pursuant to 1004 requirements.

The following compliance issues were observed during this inspection:

- Utility equipment remaining
- Access road unreclaimed

Refer to the Reclamation and COGCC Comments section of this report for additional details.

Refer to the photo-documentation attached to this report for additional details.

Any outstanding CA's from previous inspections remain applicable.

Conduct reclamation on the location/road in accordance with 1004 rules including, but not limited to: removal of utility equipment, removal of gravel, compaction alleviation, recontour/regrade and establish vegetation with total perennial, non-invasive uniform plant cover of at least 80% of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district.

Comply with Rule 1002.f and ensure erosion controls are implemented to stabilize the seeded soil.

Ongoing stormwater and weed management required until Final Reclamation has passed.

Overall Final Reclamation **Fail** Well Release on Active Location  Multi-Well Location

**ECMC Comments**

Comment	User	Date
<p><b>RECLAMATION COMMENTS:</b> Pursuant to Form 6(s) #403143603, well API #05-081-07096 was plugged and abandoned on 06/12/2022. Form 4 #403816931 stating final reclamation complete was received by ECMC on 06/06/2024.</p> <p>The location is primarily composed of intermediate and crested wheatgrass. Big sagebrush is present in secondary amounts. During the time of inspection, no noxious weeds or undesirable plant species were observed. It was also observed that species planted do not reflect species within the adjacent undisturbed reference areas, or vegetation that existed pre-disturbance.</p> <p>Utility equipment that is no longer in use remains at the location. Utility equipment is associated with the O&amp;G Location for O&amp;G operations, and the corrective action requirements for removal remains applicable. It is the ECMC's expectation that SWN will coordinate with the equipment's owner for removal.</p> <p>Access roads have not been removed or reclaimed; gravel and compaction is evident. The access road to the Walker 7-93-3/Pad 2 did not pre-exist the location. It is noted that the access road was utilized for both the Culverwell 3-21 and the Walker 7-93-3/Pad 2 Locations. Both Operators (SWN and Quicksilver Resources Inc) share responsibility for reclamation of the access road. After review of records, it has been determined that Quicksilver is responsible for the reclamation of the section of access road from the Culverwell 3-21, to the Walker 3-2 Location; and SWN is responsible for the reclamation of the remaining access road that travels Northeast from the Walker 3-2 Location. Refer to inspections #696206200 and #696206202 for additional details.</p> <p>Pursuant to Rule 1004.a, all debris, abandoned gathering line risers and flowline risers, and surface equipment shall be removed within three (3) months of plugging a well. All access roads to plugged and abandoned wells and associated production facilities shall be closed, graded and recontoured. Well locations, access roads and associated facilities shall be reclaimed. As applicable, compaction alleviation, restoration, and revegetation of well sites, associated production facilities, and access roads shall be performed to the same standards as established for interim reclamation under Rule 1003. All other equipment, supplies, weeds, rubbish, and other waste material shall be removed. All such reclamation work shall be completed within twelve (12) months on non-crop land after plugging a well or final closure of associated production facilities.</p>	gaaschee	11/06/2025
