Operator Comments:

KMOG is requesting approval to install three small permanent micro instrument air skid compressors housed in a cabinet measuring approximately 3'x5' on the Gobbler 15N-27HZ well pad (location 431703). The skids will reduce emissions and the environmental impact by providing instrument air, instead of natural gas, to operate the pneumatically controlled wellhead valves for the Turkey 16N-27HZ, Gobbler 36N-27HZ, Gobbler 37C-27HZ, and Gobbler 37N-27HZ wells.

This request is related to sundry 404398794, which requests the installation of a 15hp instrument air compressor skid at the Gobbler Tank Battery 15S-27HZZ (location 319170). The instrument air skid will provide instrument air to operate the facility equipment for the following wells: Turkey 16N-27HZ, Gobbler 36N-27HZ, Gobbler 37C-27HZ, and Gobbler 37N-27HZ (location 431703), and Gobbler 14C-27HZ and Gobbler 35N-27HZ (location 431704).

No additional flowlines will be installed to this well pad, as the 15hp compressor is set at the facility and the micro air skids are installed on the well pad. The micro air skids will supply instrument air to operate the pneumatically controlled wellhead equipment for the Turkey 16N-27HZ, Gobbler 36N-27HZ, Gobbler 37C-27HZ, and Gobbler 37N-27HZ wells.

This equipment is not expected to result in additional traffic, light, or noise impacts to surrounding stakeholders.

Please see attachments for details.

KMOG plans to install the new equipment on November 24, 2025.
