General Comment:

On 10/29/2025, NW Reclamation Specialist Emily Gaasche conducted a final reclamation inspection at SWN Production Company LLC's Walker 7-93-3/Pad 1 location in Moffatt County, Colorado.

It was observed in this inspection that reclamation has not been completed pursuant to 1004 requirements.

The following compliance issues were observed during this inspection:

- Utility equipment remaining
- Weeds
- Stormwater
- 1004 final reclamation (vegetation uniformity; sediment trap remains; soil stockpile remains)
- Protection of soils
- Access road remains

Refer to the Reclamation and COGCC Comments section of this report for additional details.

Refer to the photo-documentation attached to this report for additional details.

Any outstanding CA's from previous inspections remain applicable.

Comment:

Corrective Action: _____ Date _____

Conduct reclamation on the location/road in accordance with 1004 rules including, but not limited to: removal of utility equipment, removal of gravel, compaction alleviation, recontour/regrade and establish vegetation with total perennial, non-invasive uniform plant cover of at least 80% of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district.

Comply with Rules 1004.e and 606.c: Oil and Gas Locations will be kept free of all Undesirable Plant Species.

Ongoing stormwater and weed management required until Final Reclamation has passed.

Multi-Well Location

ECMC Comments

Comment	User	Date
<p>Reclamation Comments: Pursuant to Form 6(s) #403143600, well API #05-081-07050 was plugged and abandoned on 06/10/2022. Form 4 #403816926 stating final reclamation complete was received by ECMC on 06/06/2024.</p> <p>The location is primarily composed of intermediate and crested wheatgrass. Scotch thistle, a List B noxious weed, is present throughout the location. An infestation of knapweed, a noxious weed, is present on the northeastern portion of the location. It does not appear as though weeds have been managed in 2025. Some portions of the location, such as the southern area, are not progressing towards 1004 reclamation standards. These areas remain predominantly bare and have not achieved uniform, desirable, perennial plant establishment. Erosion, rilling and sediment migration is occurring in these areas. It was also observed that species planted do not reflect species within the adjacent undisturbed reference areas, or vegetation that existed pre-disturbance; records show surface owner approved of the mix.</p> <p>Contour work is inadequate as fill slopes and stockpiled soils/berm remains on the west end of the location. A sediment trap at the southeastern end of the location has not been recontoured and/or reclaimed.</p> <p>Utility equipment that is no longer in use remains at the location. Utility equipment is associated with the O&G Location for O&G operations, and the corrective action requirements for removal remains applicable. It is the ECMC's expectation that SWN will coordinate with the equipment's owner for removal.</p> <p>Access roads have not been removed or reclaimed; gravel and compaction is evident. Erosion, rilling and sediment transport is occurring on the road. The access road to the Walker 7-93-3/Pad 1 did not pre-exist the location.</p> <p>Pursuant to Rule 1004.a, all debris, abandoned gathering line risers and flowline risers, and surface equipment shall be removed within three (3) months of plugging a well. All access roads to plugged and abandoned wells and associated production facilities shall be closed, graded and recontoured. Well locations, access roads and associated facilities shall be reclaimed. As applicable, compaction alleviation, restoration, and revegetation of well sites, associated production facilities, and access roads shall be performed to the same standards as established for interim reclamation under Rule 1003. All other equipment, supplies, weeds, rubbish, and other waste material shall be removed. All such reclamation work shall be completed within twelve (12) months on non-crop land after plugging a well or final closure of associated production facilities.</p>	gaaschee	11/05/2025
