<p>RECLAMATION COMMENTS: Form 4 #403816951 stating final reclamation complete was received by ECMC.</p> <p>The location lies within a crop field. The crop appears to be rotated and is currently planted with winter wheat. Crop establishment appears to be thin and sparse in some places and soil lighter in color; a follow-up inspection will be conducted during the growing season to determine vegetation progression and compliance with 1004 rules. No noxious or undesirable plant species were observed during the inspection.</p> <p>Old signage with incorrect Operator information is present at the location. Removal is required.</p> <p>Reclamation work including removal of gravel, compaction alleviation and revegetation has not been performed along the access road and Location entrance.</p>	gaaschee	11/07/2025
