Comment: The stormwater compliance issues from inspection #719200329 remain outstanding.
 -Erosion, degradation and sediment transport is evident along a rock-armoured drainage channel on the southern portion of the location behind equipment. Comply with 1002.f.
 -A drainage channel on the western portion of the location is laden with sediment, reducing capacity. The channel appears to be discharging off site. Stormwater controls appear to be insufficient or missing; comply with 1002.f. and implement or maintain stormwater BMPs.
 -Erosion and rilling occurring along the perimeter of the eastern interim area. Stormwater controls appear to be missing or insufficient; comply with 1002.f. and implement or maintain stormwater BMPs.

Corrective Action: Comply with 1002.f.; Oil and gas operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation. BMPs shall be maintained until the facility is abandoned and final reclamation is achieved pursuant to Rule 1004.
