## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This form has been prepared in accordance with ECMC Rule 911.a to provide prior notice of closure of the Ocker 3-19A production facility, plugging and abandonment of the Ocker 3-19A wellhead and the removal of the associated flowline. The flowline will be permanently removed. The on-location flowline system pre-removal notice was submitted under Form 44 Document No(s). 404305290. A Form 42 pre-abandonment notice for on-location flowline removal was submitted under Document No. 404305307. The topographic Site Location Map showing the geographic setting of the site is provided as Figure 1.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Following facility decommissioning, wellhead plugging and abandonment and flowline removal activities, discrete soil samples will be collected from the surfaces and excavation area(s). Samples will be analyzed for all analytes listed in ECMC Table 915-1. Soil samples will be submitted to an accredited laboratory for analysis using standard methods appropriate for detecting the target analytes in ECMC Table 915-1. Facility infrastructure and the proposed soil screening and sample locations for the facility, wellhead and flowlines are provided on Figures 2, 3, & 4.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during decommissioning activities, a minimum of one grab sample will be collected as soon as practical. Groundwater samples will be submitted to an accredited laboratory for all analytes listed in ECMC Table 915-1 Organic Compounds in Groundwater and Groundwater Inorganic Parameters using standard methods appropriate for detecting the target analytes in ECMC Table 915-1.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Following cut and cap operations, a soil vapor survey will be conducted adjacent to the former wellhead location utilizing a maximum of five (5) soil vapor points. The proposed soil vapor point locations are illustrated on Figure 2.
