2 CA# 208079

Corrective Action: Pursuant to Rule 1002.f, operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation

Date: _____

Response: CA COMPLETED

Date of Completion: 11/13/2025

Operator
Comment:

PRM has mechanically compacted the tops of the slopes on the west and southwest sides of the location, hand compacted any smaller cracks on the remainder of the slopes and reseed and mulched slopes to prevent any further cracking and soil migration from occurring. The site has been established for two years so any major risks of mass soil migration would have likely occurred. PRM will continue to inspect and maintain slopes on location if needed.
