Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 9/18/2025, Cache 8-13, 24, 34; Cornish 8-53 tank battery decommissioning activities were completed. During the completion of the activities, no potential presence of impacted material(s) was observed/smelled. Consistent with Rule 912, samples were collected and analyzed to determine whether any constituents were present at levels in excess of Table 915-1 standards. Final laboratory analytical results received on 11/25/2025 indicate that soil sample PWV01-W, PWV01-N, discovered at the former produced water vessel, exceeded ECMC Table 915 standards for 1-methylnaphthalene at 0.0091 mg/kg & 0.0134 mg/kg. Groundwater was not encountered during re sampling activities. This site is within the Mule Deer Sever Winter Range High Priority Habitat, also this location is within 300 feet of waters of the state.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 11/25/2025

Root Cause of Spill/Release Unknown (Historical)

Other (specify) _____

Type of Equipment at Point of Spill/Release: Partially Buried Vessel

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

The potential presence of impacted material(s) was identified during tank battery decommissioning activities beneath the produced water vessel (PWV). The volume of potentially impacted material(s) is not currently known. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

PDC conducts routine AVO inspections of all oil and gas facilities in order to identify and mitigate potential releases. Further, this facility is no longer active and is in the process of being decommissioned. The produced water vessel has been taken out of service, and there is no longer a possibility of a release originating from this infrastructure.

Volume of Soil Excavated (cubic yards): 0

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment
 Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

- Basis for Closure:
- Corrective Actions Completed (documentation attached, check all that apply)
 - Horizontal and Vertical extents of impacts have been delineated.
 - Documentation of compliance with Table 915-1 is attached.
 - All E&P Waste has been properly treated or disposed.
 - Work proceeding under an approved Form 27 (Rule 912.c).
Form 27 Remediation Project No: _____
 - SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

OPERATOR COMMENTS:

PWV01-W, PWV01-N are located in the same excavation and are considered one release.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
