<u>No BMP/COA Type</u>	<u>Description</u>

Operator Comments:

PDC Energy, Inc. (PDC) is submitting this sundry to update the existing equipment inventory on the Drake 4N64W17 1-24 pad and to provide details on new equipment installations.

PDC will add two electric-drive compressors for gas-lift operations and additional ancillary equipment as reflected on the attached facility layout drawing. All equipment will be located within the originally permitted disturbance area.

Based on the modeling presented in the Noise Mitigation Plan submitted with the OGD for this site, PDC does not anticipate that the installation of the two additional compressors will result in noise levels exceeding regulatory limits at the nearest receptors. However, if elevated noise levels are observed or complaints are received from nearby RBUs, PDC will implement additional mitigation measures, which may include the installation of permanent sound walls around the compressors.

PDC submitted the relevant 301.c sundry notice on 11/5/2025 under document ID number 404424703.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
