### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	1000 sqft	soil sampling

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Historic F19: Employee was topping off produced water tank (#42). during a break in operations the hose was left connected to the top of tank and the valve was left open. The produced water pump was brought back on line and quickly overtopped tank 41. fluid release was for 3 to 4 minutes. Employees saw fluid on pad surface and around tanks. No fluid left the pad surface. all the fluids were contained by the pad berm. A vac truck was on site and the fluid was pumped from the pad surface almost immediately. Approx 20 bbls of fluid was recovered, between 5 -10 bbls of fluid was absorbed by the soil on the pad surface. Drilling operations are ongoing. Portions of the spill are under the tank battery and are inaccessible. Soil sampling of the spill location will be conducted on July 8.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Initial soil samples were collected at time of release, with no access to a majority of release due to tanks on working surface. Map attached to display sampling locations and spill path.

#### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

#### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

#### Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Volume of solid waste (cubic yards)          Volume of liquid waste (barrels)         

Is further site investigation required?

## **REMEDIAL ACTION PLAN**

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

### **SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

Source removal is currently not possible for area has been reclaimed where surface release occurred. It is estimated that 10 - 30 ' of soil is placed on top of area.

### **REMEDIATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Due to reclamation over source area, Laramie is requesting:  
1. A path to closure that will follow 915.b  
2. An onsite with Env and Rec Group to determine route is best approach.  
After meetings (likely Summer 2023) a proposed closure/NFA will be described in supplemental form 27. Estimate late Summer 2023 for closure of REM.
