An Inspection performed by ECMC on 10/14/2025 at the Fox Creek 33-0461B stated that, “Conductor and Well Cellar appear to still be present at Well Site. A Form 4 Sundry 402617966 for Abandon Permit was filed on 03.04.2021 and Approved on 03.08.2021. indicating that operation has not been conducted. The well has not been drilled. The site will be used in the future. Field Audit demonstrates that location construction and some part of wellbore was initiated without appropriate documentation.

As a result, the ECMC required Bison to provide a full description of activity and current status at this location. Location and APD were indicated to have been abandoned without construction or drilling (Sundry 402617966). Provide these details on a Form 4 Sundry Notice. If any casing was placed, a Form 5 Drilling Completion Report is required. Final reclamation and pad closure need to be conducted.

The Fox Creek 33-0461B (Facility ID 459091) is a well that was never drilled. Only the conductor for this well was set. As such, it never produced. It is located at the Fox Creek 33 NWNW (Facility ID 417093), which is an operating facility.

The Collar for the well has been removed and the well was cut and capped. Photos below.
