Trey

Approved as outlined. I would like the plug tagged.

Thanks Eric

Eric,

On the State Eagle 17-1 (05-005-06988) re-entry we ran into some sort of fish around 1,500-2,000' that we've been able to push down to 4,365' but ROP has dropped drastically in last few hours. We think we are pushing the fish down as returns went from cement and dehydrated mud to clean returns. We also aren't picking up any cuttings when we run sweeps. We made a bit trip on Saturday but can't seem to be able to get a bite on the fish to mill it up.

With your approval I'd like to plug out from 4,365'. We'll pump a 200' plug from 4,365' – 4,165', tag the plug, then move up hole and complete P&A operations as per the Form 6.

Thanks,

Trey Sloan
