Lorena,

I was finally able to get a response from the surface owner for the Kaufman 1-A. We originally got consent from them back in November of 2024, but the work was delayed.

He responded very simply below. Please let me know if this is going to be sufficient for the S.O. Consent for this well.

Arend,

Following up on this.

Arend,

I hope this email finds you well.

Following up on this matter from a year ago. We were able to re-enter 2 of the 3 wells. The 3<sup>rd</sup> well (Kaufman 1-A) was delayed for a variety of reasons, but we are needing to also re-enter this well now.

Does your timing request of before April still hold true?

Please give me a call to discuss.

Ok. My only other requirement is no metal flags. Please use wood. The metal gets chopped up and put in the silage pile potentially lead to dead cows.

Thanks Arend.

We will be out there ASAP to locate these wells with a magnetometer. I am told that we should be able to accommodate your request to be done by April, but I will keep you updated.

Good morning Arend,

As a part of some of our upcoming oil and gas activity, we are going to have to re-enter the three wells attached. This is needing to be done by end of May I believe.

I wanted to jump on this early and reach out to you so that we could try and work around any sort of timing constraints you may have and see if we needed to jump on these sooner rather than later.

Again, this is not a preference and we have to get on these wells. I will follow up with a phone call to discuss with you.
