(DETAILS OF WORK)

We will shoot off 5½" OD casing at approximately 4300' or where cement filled up to around casing and pull same. Will fill hole with mud and place a 20' cement plug in the bottom of surface casing and a 20' cement plug in top of surface casing with a welded steel plate at top which is 4' below ground level and will not interfere with soil cultivation.

The oil string of casing was set at 5432' in this well w/150 sacks cement, if this string of casing is shot off at 4300' this will leave approximately 1132' of 5-1/2" OD casing in bottom of hole.
