Spill/Remediation:

Comment: Remediation Proj. #35552 for facility closure on the Location remains active and "in process". Last Form 27 (#403844789) on file was approved 9/11/2024 with the following COAs:

- 1) Operator shall sample for Soil Suitability for Reclamation
- 2) Operator shall address arsenic exceedances.

Ongoing remediation efforts on the Location do not appear to be occurring and initial 1004 Final Reclamation has since been performed (see "Final Reclamation").

Including EPS on FIR for notification purposes.

Corrective Action:	Contact area EPS regarding Remediation Proj. #35552.	Date: <u>01/09/2026</u>
	Comply with all outstanding COAs provided on an approved Form 27 or Form 4.	
	Comply with Rule 913.e reporting requirements.

Comment:

It was observed in this inspection that reclamation of the Location and access road has been performed; Location/road has been recontoured/graded. Compaction alleviation appears to have been performed, though it is unclear if site has been "cross-ripped" pursuant to Rule 1003.c. Noxious Weeds (Halogeton) observed on Location- additional weed management efforts required during the 2026 growing season.

Cable and other trash observed scattered throughout the Location.

Remediation Project #35552 remains active on the Location. Any reclamation work performed has been done so "at risk", as work that could be necessary to resolve the remediation project may result in redisturbance of the reclaimed areas

Corrective Action: **Comply with Rule 1004 and 606- remove trash/debris/rubbish remaining on the Location.**

Date **01/17/2026**
