General Comment:

This is a desk-top inspection in response to FIRR document number 404500617.

The inspection observed that rig anchors, if present, were not marked, per rule 1003.

The operator promptly resolved the CA On 01/09/2026 by verifying that "no rig anchors wre present on the DC-22 CO2 well location. The well was drilled with a precision super single rig that required no anchors to be installed for guy wires. The rig used for well completion utilized a base beam for support, no need for rig anchors."
