Please be cautious: KPK External Sender Notice: This email is from an external sender. Please take care when clicking links or opening attachments. When in doubt, contact your IT Department

Daniel,

I have questions about this form, I'm under the impression that the Grant 2 wellhead has not yet been decommissioned. Also, the dates you provided said the spill was discovered in 2023. Could you help me understand what is going on with this Form 19, please?

Best regards,

Robert Aronoff, PG

Subject: Grant 2 Wellhead

During decommission activities at the Grant 2 Wellhead, KPK determined (via laboratory results) that a historical release occurred. The facility is located at 40.115070, -104.967660. One sample location (SW-3) exceeded the ECMC's Table 915.1 Residential Soil Screening Levels for total petroleum hydrocarbons. The spill is located approximately 849' from a wetlands habitat, approximately 981' surface water and 209' from an occupied building. Due to this exceedance, KPK has filed a Form 19 I with the ECMC (Doc. 404116272) and has notified Weld County and the landowner of this release. Please contact me if you have any questions.
