**General Comment:**

On Friday, January 09, 2026 Southwest Compliance Specialist James Blair inspected the Beeman Drilling Gladys #2 well. On Monday January 12, I returned to the site to take additional photos. Well conditions did not change but for weather. Observed Endurance drilling rig layed down and stacked out, along with equipment including a white box utility trailer and a flat bed utility trailer. Observed an open top trailer with oily waste and free fluid. Beeman has been cited for similar non-compliance and improper storage of waste on other locations in the past. See document #685200622. Observed various miscellaneous tools and containers. Observed improperly stored trash and oily rags in open-topped plastic container. This inspection focussed work over rig storage, improper E&P waste storage/management. The remote tank battery associated with the well was not inspected.
