

Date of Inspection	12/30/2025
Inspector Name	Tyson Dilka, Stelbar
Location Name	State B 1
API	05-121-09383
COGCC Loc ID	317155
County	Washington
Location Directions	CR TT & 25, E to end, then NE into
Lat/Long	39.942185, -102.854175
Area Inspected	Former well & tank battery
Equipment on Site	No
Livestock Grazing	Yes
Fences	No
Weeds or Debris	No
Visual of Vegetative Cover	Location is visually observed at 80% overall
Stormwater	No stormwater issues observed, cattle and burrowing animals have created minor disturbance
Recommendations	Final Reclamation Release
Photos	See below 1-8.
Response to Inspection	<p>The access road does not require reclamation, as it serves as access to a livestock water tank approximately 3500 ft to the SW of the location. The road was extended by the landowner (State of CO) at an unknown date after spud of the well. There is no access to the water tank from the property to the west as there is a fenceline and there is a private landowner (Rogers). Please reference photos 1 and 2 below.</p> <p>Photo 8 in document 708201895 indicates bare soil at the former well location. This is due to burrowing animals and livestock disturbance, not due to lack of progression of vegetation establishment. There are other areas in adjacent reference areas that also have bare soil due to burrowing animals. Please reference photo 3 below.</p>

Photo 1. Map showing extended access road to water tank and no access from adjacent property to the west.

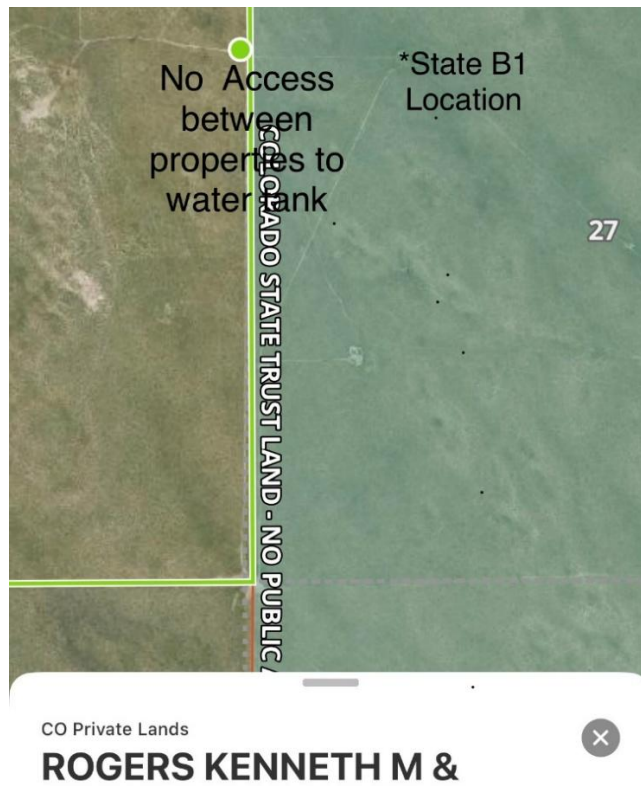

Photo 2. Map showing property line and no access to water tank between State of CO and Rogers properties.

Photo 3. Reference area south of the location showing burrowing animal disturbance creating bare soils. Photo taken at lat/long 39.9383, -102.8575.
