Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECOM is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR INFORMATION

Name of Operator: <u>NOBLE ENERGY INC</u>	Operator No: <u>100322</u>	Phone Numbers

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	NA	Lab Analysis and Field screening if encountered
Yes	SOILS	Refer to analytical tables & figure	Lab Analysis and Field screening

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A site investigation was conducted pursuant to ECMC Rule 911 at the Wolfe USX T4N-R63W-S7 L02 / Wolfe USX CC07-16 Facility and Tank Battery location. Facility and tank battery decommissioning occurred on May 2, 2024.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Grab confirmation soil samples were collected from the produced water vessel(s) excavation, beneath the ground oil tank(s), and at the risers for the flowline(s) and dumpline(s) of any separator(s). Soil samples were analyzed by a certified laboratory for the full extent of Table 915-1, including but not limited to: TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons) organic compounds in soil per ECMC Table 915-1, and EC, SAR, pH, metals, and boron. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during the site investigation, a grab groundwater will be collected and analyzed for all organic and inorganic compounds per ECMC Table 915-1.

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

Visual inspection of the wellhead and flowline areas occurred during decommissioning activities. Field personnel screened all disturbed areas using visual and olfactory senses to determine if laboratory confirmation sampling was required.

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 5

Number of soil samples exceeding 915-1 0

NA / ND

ND Highest concentration of TPH (mg/kg) _____

-- Highest concentration of SAR 0.128

Was the areal and vertical extent of soil contamination delineated? No

BTEX > 915-1 No

Approximate areal extent (square feet) 0

Vertical Extent > 915-1 (in feet) 0

Groundwater

Number of groundwater samples collected 0

Highest concentration of Benzene (µg/l) _____

Was extent of groundwater contaminated delineated? Yes

Highest concentration of Toluene (µg/l) _____

Depth to groundwater (below ground surface, in feet) _____

Highest concentration of Ethylbenzene (µg/l) _____

Number of groundwater monitoring wells installed _____

Highest concentration of Xylene (µg/l) _____

Number of groundwater samples exceeding 915-1 _____

Highest concentration of Methane (mg/l) _____

Surface Water

0 Number of surface water samples collected

0 Number of surface water samples exceeding 915-1

If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Twenty-five (25) background samples were collected from five (5) soil borings succeeding the facility decommissioning. The background samples were collected at approximately one half (0.5) to four (4) feet below ground surface (ft bgs) and analyzed for ECMC Table 915-1 inorganic and metal constituents. The maximum background concentration for pH was observed to be 9.22, and the maximum background concentration for boron was observed to be 2.00. The maximum background concentrations including the additional 1.25 multiplier for arsenic and cadmium were observed to be 4.83 and 0.515 mg/kg, respectively. The analyzed samples were within ECMC Table 915-1 standards/maximum background levels except for boron at SEP01-DL@3' and cadmium at FL01R-S@3'.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) _____

Volume of liquid waste (barrels) _____

Is further site investigation required?

An SSI to vertically and horizontally delineate the boron exceedance at SEP01-DL@3 was completed on 12/31/2025. A total of six soil samples were collected and delivered to the lab for processing on 12/31/2025. The pending analytical results are anticipated within sixty days and will be submitted on the subsequent Form 27. The COC document is attached to the current form. Delineation soil samples collected were submitted for Full ECMC Table 915-1 analysis. Background samples were unable to be collected due to landowner access restrictions.

A supplemental site investigation (SSI) will be completed to collect additional background samples (3+). Background samples will be collected to determine if the observed boron and cadmium exceedances observed are attributed to native soil conditions at the site. Background samples will be collected and analyzed for Table 915-1 inorganic and metal constituents. A proposed site investigation plan was submitted within approved form 27 (Doc. #404136999).

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

On November 13, 2024, approximately 10 cubic yards (cy) of impacted material were removed from the former AST location during remedial excavation activities. All impacted soils removed from site were transported to the Buffalo Ridge Landfill in Keenesburg, CO for disposal under Noble waste manifests.

REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Following excavation activities, five confirmation soil samples were collected from the base and sidewalls of the final excavation extent. All confirmation soil samples were analyzed for the full ECMC Table 915-1 suite. Analytical results for soil samples collected the final excavation extent indicated that all organic compounds were compliant with ECMC Table 915-1.

An SSI to vertically and horizontally delineate the boron exceedance at SEP01-DL@3 was completed on 12/31/2025. A total of six soil samples were collected and delivered to the lab for processing on 12/31/2025. The pending analytical results are anticipated within sixty days and will be submitted on the subsequent Form 27. The COC document is attached to the current form. Delineation soil samples collected were submitted for Full ECMC Table 915-1 analysis. Background samples were unable to be collected due to landowner access restrictions.

A supplemental site investigation (SSI) will be completed to collect additional background samples (3+). Background samples will be collected to determine if the observed boron and cadmium exceedances observed are attributed to native soil conditions at the site. Background samples will be collected and analyzed for Table 915-1 inorganic and metal constituents. A proposed site investigation plan was submitted within approved form 27 (Doc. #404136999).

Soil Remediation Summary

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Groundwater was not encountered during decommissioning activities.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

Quarterly Semi-Annually Annually Other

Request Alternative Reporting Schedule:

Semi-Annually Annually Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: Groundwater Monitoring Land Treatment Progress Report O&M Report

Other Quarterly Update

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Noble intends to directly address the costs of remediation at the locations as part of our asset retirement obligation process and operations. Noble has general liability insurance (policies MWZZ316714 and MWZX316724) and financial assurance in compliance with ECMC rules. Records are available on the ECMC's website. The cost for remediation is an estimate only, costs may change upwards or downward based on site-specific information. Noble makes no representation or guarantees as to the accuracy of the estimate.

Operator anticipates the remaining cost for this project to be: \$ 50000

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? Yes

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

No beneficial use

Volume of E&P Waste (solid) in cubic yards 10

E&P waste (solid) description Hydrocarbon Impacted Soils

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: Buffalo Ridge Waste Management

Volume of E&P Waste (liquid) in barrels 0

E&P waste (liquid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

Compliant with Rule 913.h.(1).

Compliant with Rule 913.h.(2).

Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? No

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? Yes

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Reclamation will be in accordance with ECMC 1000 Series Rules.

Is the described reclamation complete? Yes

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 05/02/2024

Proposed date of completion of Reclamation. 12/31/2028

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 11/15/2023

Actual Spill or Release date, or date of discovery. 06/07/2024

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 05/02/2024

Proposed site investigation commencement. 08/29/2025

Proposed completion of site investigation. 03/31/2026

REMEDIAL ACTION DATES

Proposed start date of Remediation. 03/31/2026

Proposed date of completion of Remediation. 09/30/2026

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

Proposed completion of site investigation date is being updated to reflect the completion of the remedial delineation at soil sample SEP01-DL@3 at the Wolfe USX CC07-16 tank battery, and the necessity for additional background sampling. This work has been prioritized and is tentatively scheduled to occur by the end of 1Q 2026.

OPERATOR COMMENT

This form has been submitted to provide a 1Q 2026 timeline update for the Wolfe USX CC07-16 facility (REM #33389). An SSI to vertically and horizontally delineate the boron exceedance at SEP01-DL@3 was completed on 12/31/2025. A total of six soil samples were collected and delivered to the lab for processing on 12/31/2025. The pending analytical results are anticipated within sixty days and will be submitted on the subsequent Form 27. The COC document is attached to the current form. Delineation soil samples collected were submitted for Full ECMC Table 915-1 analysis. Background samples were unable to be collected due to landowner access restrictions. Active negotiations with landowner are in progress regarding access terms and timing.

A supplemental site investigation (SSI) will be completed to collect additional background samples (3+). Background samples will be collected to determine if the observed boron and cadmium exceedances observed are attributed to native soil conditions at the site. Background samples will be collected and analyzed for Table 915-1 inorganic and metal constituents. A proposed site investigation plan was submitted within approved form 27 (Doc. #404136999).

In response to ECMC Form 27 Comment dated 10/26/2025 (Doc. #404385241), the site investigation proposed is of the Operator's highest priority and the change in schedule is reflected within the current form. The updated timeline takes in account the necessity for the collection of additional backgrounds samples to be completed. The proposed work will be completed by the end of 1Q 2026.

Pursuant to Rule 913.e., quarterly reporting will be conducted until all closure criteria are achieved for the remediation project. The results of the supplemental site investigation will be submitted on a subsequent Form 27

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Signed: Scott Williamson
