Toni / Lorena,

Please see the consent below for the additional Olson well. Please confirm that this will suffice.

WARNING - This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.

Yes, you have consent.

As I recall, it was also pretty deep when something happened and they had to move over to redrill. I assumed you were doing both.

What about the well in the NW 1/4? It actually produced a bit. Anadarko was inquiring about re-plugging it, but never to my knowledge, followed through.

Roger

Roger, in addition to the two wells mentioned above, we discovered a third well with the same naming convention of Olson 1. This other Olson 1, (API 05-123-06136), was the failed parent well of the Olson 1-X. Both drilled in 1966 by OXY.

We need to re-enter this well and would like to do it at the same time. We are getting to rig up on the other two wells.

Can you please provide your consent for this as well?

Roger,

Yes, we will commit to this. With that being the case, please confirm once more that we have your consent.

Evan

Re-entry agreed to provided, Chevron agrees to pay crop damage/loss and pay for or perform restoration and remediation as needed to make property whole.

Do you so agree?

I think there will be wheat at the NW4 site and I don't think at the Olson 1-X at this time

Thanks

Roger

Good afternoon Mr. Olson,

Thank you again for your time today. Below you will see the image of the Olson 1 and Olson 1-X that we are needing to complete a re-entry job for.
