## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911 a site investigation was conducted pertaining to the Foss 06-33 flowline and Foss 06-35 wellhead and flowline. The Foss 06-35 wellhead was cut and capped per ECMC rules on 01/29/2025. Approximately 1514' of the Foss 06-35 flowline was removed on 03/12/2025. Approximately 555' of the Foss 06-33 flowline was removed on 03/12/2025. The ECMC was notified on Form 44, Document #404203088 of the full removal of both flowlines.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

A grab soil sample was collected at the base of the former wellhead excavation, and four soil samples were field screened at the N-E-S-W sidewalls of the wellhead. Soil samples were taken along the flowline at any points of material change/hammer unions, directional changes, as well as at the bell holes on either side of a waterway, and the terminuses at the wellhead and separator. Soil samples collected were analyzed by a certified laboratory for the full extent of Table 915-1, including but not limited to: TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons) organic compounds in soil per ECMC Table 915-1, and EC, SAR, pH, metals, and boron. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during the site investigation, a grab groundwater sample will be collected and analyzed for all organic and inorganic compounds per ECMC Table 915-1.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Visual inspection of the wellhead and flowline areas occurred during decommissioning activities. Field personnel screened all disturbed areas using visual and olfactory senses to determine if laboratory confirmation sampling was required.

Were background samples collected as part of this site investigation?  
 Six (6) background samples were collected during flowline decommissioning at the adjacent Foss 06-34 Flowline (REM # 39225) on 03/10/2025. These background samples were reported under Site Investigation and Remediation Workplan (Doc. # 404217970) which has been "DENIED" due to samples being analyzed out of hold time by the laboratory. Due to the Form 27 being "DENIED" by the ECMC, the analytical results of the six (6) backgrounds samples collected under Foss 06-34 will not be used for comparison to the decommissioning samples.

Is further site investigation required?  
 The organic exceedances identified at sample locations FL02R-W [naphthalene and benzo(a)anthracene], FL02-01 [naphthalene and benzo(a)anthracene] and FL01-01 [benzo(a)anthracene and benzo(a)pyrene] during decommissioning will be removed through remedial excavations. Additionally, the pH (FL02R-W) and arsenic (FL02R-W, FL02-01, and FL01-07) exceedances will also be encompassed in the remedial excavations. The impacted soil will be segregated for proper off-site disposal. The excavations are anticipated to be 10 feet (ft) x 10 ft x 5 ft at FL02R-W and 10 ft x 10 ft x 6 ft at FL02-01 and FL01-07. Remedial excavation confirmation soil samples will be collected from the base and sidewalls and analyzed for full ECMC Table 915-1 analysis. Concurrently with the remedial excavation, background samples (5+) will be collected to determine if the pH and arsenic exceedances are attributable to native soil conditions at the site. Background samples will be analyzed for inorganics and metals in soil per ECMC Table 915-1. The proposed sample locations are depicted in a map in an "approved" previous form 27 (Doc.#404394112).
