**Environmental**

**Spill/Remediation:**

Comment: This is an Environmental Inspection for Remediation Project # 42875. At the time of inspection, no work had been completed at the site. Production equipment and the wellhead remain in place.  
 Per approved Implementation Schedule in Form 27-I document no. 404374073. The proposed site investigation commencement was 12/01/2025. In accordance with Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

In addition, Operators will collect and submit for laboratory analysis a soil sample collected from the areas most likely to have been impacted during the operational life of the AST and flowline. These areas include, but are not limited to; where Flowlines connect to the wellhead, surface equipment, risers, valves, separators or manifolds, where Flowlines bend or were repaired in the past and at joints and hammer unions. Where Flowlines connect to Flowlines or equipment of different material: and where Flowlines cross drainages or surface water or are in contact with shallow groundwater.

Operator shall provide an updated Implementation Schedule for Remediation Project # 42875.
