Per the COA on document number 403955089 the Operator established soil suitability for reclamation parameters in background samples. Background samples were collected in five locations from an area not impacted by oil and gas development at similar depths (3' and 5') and lithologies as confirmation samples collected at the location and analyzed for ECMC Table 915-1 metals and soil suitability for reclamation standards (SSR) (pH, EC, SAR, and Boron). The samples will be used to characterize native soil and potentially attribute elevated metals and inorganic concentrations to native soil conditions.

The Operator provided additional characterization of the magnitude and extent of electrical conductivity (EC) impacts on the site. The Operator also resampled locations (SS-1, SS-2, SS-3, SS-4, SS-5, SS-6, SS-8, and SS-9) with previously documented soil suitability exceedances and analyze those samples for Table 915-1 Contaminants of Concern.

**REMEDIAL ACTION PLAN**

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

**SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

Organic soil impacts were not discovered during the SHABLE USX AB 11-04P produced water vault decommissioning. Based on decommissioning site investigation activities and laboratory analytical results of confirmation soil samples collected from the produced water vessel excavation removal of soil is not needed. The material excavated during produced water vault removal activities was used as backfill for the excavations.

**REMEDICATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Based on site investigation activities and laboratory analytical results for confirmation soil samples collected from the produced water vessel excavation a remediation plan is not needed.

Lab data was received on 11/20/2025 and is currently being reviewed and compiled into a report which will be submitted on the next form submittal. Supplemental Form 27s will be prepared and submitted on a quarterly schedule to provide updates and progress of the remediation until closure criteria has been achieved.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
