Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Per the general comments issued by the ECMC for denied Form 27 Document No. 404063972, while conducting additional soil investigations at the Briggs 1-11 wellhead, historically impacted soil was discovered at the former wellhead location. The volume of the release is unknown. Assessment activities are ongoing. The historically impacted soil will be removed and disposed of and confirmation soil samples will be collected in compliance with ECMC Table 915-1. The topographic Site Location Map showing the geographic setting of the release is provided as Figure 1. The wellhead excavation is depicted on Figure 2. The background soil sample locations are illustrated on Figures 2 and 3. The PID readings and soil sample results are summarized in Tables 1 and 2, respectively.

OPERATOR COMMENTS:

Laboratory results for sample WH-B01@6' were received on October 29, 2025; however, background samples were still needed at that time for inorganic compliance assessment. Background samples were collected on January 8, 2026. The analytical results were received on January 20, 2026, and confirmed the presence of impacts at WH-B01@6'.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
