Eric,

We are currently rigged up on the Bass Box Elder Farms 10-33 (05-001-08450) for a re-entry and appear to be pushing something down since about 2,000'. Our ROP stayed pretty high originally but fell off considerably this weekend to the point we aren't making much progress anymore and are currently at 4,695'. With your approval I'd like to plug out from here with a cement plug from 4,695' – 4,495'. We will tag that plug then move uphole and finish the job as per the Form 6.

We did make a bit trip without much change.

Thanks,

Trey Sloan
