COMMENTS:

In response to Form 4 # 404103549 This well produces water from the annulus when blown. Kt had a water analysis done which indicated 10,000 ppm CL- which is relatively fresh water. KT is going to have a sealant injected into wellhead to seal the annular space between the surface and production casing. This is scheduled for 2/8/2026. Pending the results of that test an operational plan will be submitted. The attached sheets shows the bradenhead record for the well and the water analysis.
