

NueVida Resources
Ardourel Pad
Location ID: #484496
Weed Management Summary – 2025 Program

NueVida Resources (NVR) has been actively attempting to control the spread and establishment of undesirable weed species throughout the Ardourel location. Ancell Environmental Consulting Services (AECS) began assisting NVR with their weed monitoring and mitigation program in April 2025. AECS began coordination with Horizon Environmental (Horizon) for weed control services including herbicide application, mechanical treatments (weed whacking and brush hogging), and reseeding (hydro-mulch), on April 16, 2025 ([Attachment 1](#)). Horizon conducted herbicide application across the entire Ardourel Location and pipeline right-of-way on June 9, 10, and 14 2025, with extra focus on the topsoil stockpiles ([Photo 1](#)). A special meeting was held with NueVida, AECS, and Horizon to discuss additional options for weed mitigation on June 12, 2025. It was determined that mechanical treatment and reseeding would be necessary to further mitigate the weeds at the location. Mechanical treatments were conducted October 10 through October 22, 2025 ([Photo 2](#)). All areas were reseeded November 3, 10, 11, 12 and 14, 2025 ([Photo 3](#)). [Photos 4 through 12](#) show before and after documentation. Associated invoices from Horizon including notes describing the activities conducted are attached ([Attachment 2](#)).

Hi,

I hope your week is going well.

I reached out to Horizon and they sent along a quote (see attached) and said they could spray June 1 and then do a follow up later in the summer if it looks like it might need it. Please let me know if the price and schedule are acceptable.

Thank you,
Theresa
