## CORRECTIVE ACTIONS

#1 Supplemental Report Date: 12/15/2025

Root Cause of Spill/Release Unknown (Historical)

Other (specify) \_\_\_\_\_

Type of Equipment at Point of Spill/Release: Other

If "Other" selected above, specify or describe here:

Aboveground Storage Tank

Describe Incident & Root Cause (include specific equipment and point of failure)

The potential presence of impacted material(s) was identified during tank battery decommissioning activities beneath the aboveground storage tank. The volume of potentially impacted material(s) is not currently known. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

PDC conducts routine AVO inspections of all oil and gas facilities in order to identify and mitigate potential releases. Further, this facility is no longer active and is in the process of being decommissioned. The aboveground storage tank have been taken out of service and there is no longer a possibility of a release originating from this infrastructure

Volume of Soil Excavated (cubic yards): 0

Disposition of Excavated Soil (attach documentation)  Offsite Disposal  Onsite Treatment

Other (specify) \_\_\_\_\_

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbls): 0

## REQUEST FOR CLOSURE

**Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.**

Basis for Closure:  Corrective Actions Completed (documentation attached, check all that apply)

Horizontal and Vertical extents of impacts have been delineated.

Documentation of compliance with Table 915-1 is attached.

All E&P Waste has been properly treated or disposed.

Work proceeding under an approved Form 27 (Rule 912.c).

Form 27 Remediation Project No: 42205

SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

## OPERATOR COMMENTS:

A supplemental Form 27 has been submitted for remediation project number 42205 detailing the remedial site plan, document number: 404370267.

In addition to the release at AST010, the following releases are all located on the Cornish 17-11 but are not considered the same release:

- PWV01-N, Document number: 404379445

These are considered separate releases as the PWV01-N sample is located below the surface at 2 feet and the AST01 sample is located at the surface.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
