Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	NA	Lab analysis if encountered
UNDETERMINED	SOILS	NA	Lab analysis

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911 a site investigation was conducted pertaining to the SITZMAN 27-08 wellhead cut and cap and flowline removal. As documented in Supplemental Form 27 # 404161310, the wellhead was cut and capped on 5 May 2023. On 8 May 2023, five (5) grab soil samples were field screened at the former wellhead and in the N-E-S-W directions, with one soil sample collected at the former wellhead submitted to a certified laboratory for analysis of ECMC Table 915-1 organic compounds, EC, SAR, pH and boron.

As documented in Form 44 # 403652360, approximately 182' of flowline was removed on 20 June 2023. On 15 November 2023, three (3) soil samples were field screened along the former flowline with one (1) soil sample collected at the terminus of the flowline submitted to a certified laboratory for analysis of ECMC Table 915-1 organic compounds, EC, SAR, pH and boron.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

- Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Confirmation soil sampling will be conducted by collecting one (1) soil sample at the former wellhead at 6 feet below ground surface (ft bgs) and four (4) soil samples in the N-E-S-W directions at 5 ft bgs. Two (2) grab soil samples will be collected at the endpoint of flowline removal and at the flowline terminus at the separator at a depth of 4 ft bgs. All soil samples will be analyzed by a certified laboratory for ECMC Table 915-1 soil compounds using approved ECMC laboratory analysis methods. Twelve (12) background soil samples from four (4) locations will also be collected at depths of 2, 4, and 6 ft bgs and analyzed by a certified laboratory for ECMC Table 915-1 SSR and metals.

Proposed Groundwater Sampling

- Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during the site investigation a grab groundwater will be collected and analyzed for all organic and inorganic compounds per ECMC Table 915-1.

Proposed Surface Water Sampling

- Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

- Additional alternative investigative actions described in attached Site Investigation Plan (summary):

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 0
Number of soil samples exceeding 915-1 0
Was the areal and vertical extent of soil contamination delineated? _____
Approximate areal extent (square feet) 0

NA / ND

ND Highest concentration of TPH (mg/kg) _____
-- Highest concentration of SAR 4.22
BTEX > 915-1 No
Vertical Extent > 915-1 (in feet) 0

Groundwater

Number of groundwater samples collected 0
Was extent of groundwater contaminated delineated? No
Depth to groundwater (below ground surface, in feet) _____
Number of groundwater monitoring wells installed _____
Number of groundwater samples exceeding 915-1 _____

Highest concentration of Benzene (µg/l) _____
Highest concentration of Toluene (µg/l) _____
Highest concentration of Ethylbenzene (µg/l) _____
Highest concentration of Xylene (µg/l) _____
Highest concentration of Methane (mg/l) _____

Surface Water

0 Number of surface water samples collected
Number of surface water samples exceeding 915-1 _____
If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Was investigation derived waste (IDW) generated as part of this investigation?
Volume of solid waste (cubic yards) _____ Volume of liquid waste (barrels) _____

Is further site investigation required?

Confirmation soil sampling will be conducted by collecting one (1) soil sample at the former wellhead at 6 feet below ground surface (ft bgs) and four (4) soil samples in the N-E-S-W directions at 5 ft bgs. Two (2) grab soil samples will be collected at the endpoint of flowline removal and at the flowline terminus at the separator at a depth of 4 ft bgs. All soil samples will be analyzed by a certified laboratory for ECMC Table 915-1 soil compounds using approved ECMC laboratory analysis methods. Twelve (12) background soil samples from four (4) locations will also be collected at depths of 2, 4, and 6 ft bgs and analyzed by a certified laboratory for ECMC Table 915-1 SSR and metals.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

No source was generated.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

Quarterly Semi-Annually Annually Other

Request Alternative Reporting Schedule:

Semi-Annually Annually Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: Groundwater Monitoring Land Treatment Progress Report O&M Report

Other Quarterly Update

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Noble intends to directly address the costs of remediation at the locations as part of our asset retirement obligation process and operations. Noble has general liability insurance (policies MWZZ316714 and MWZX316724) and financial assurance in compliance with ECMC rules. Records are available on the ECMC's website. The cost for remediation is an estimate only, costs may change upwards or downwards based on site-specific information. Noble makes no representation or guarantees as to the accuracy of the estimate

Operator anticipates the remaining cost for this project to be: \$ 50000

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards _____

E&P waste (solid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

Volume of E&P Waste (liquid) in barrels _____

E&P waste (liquid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

Compliant with Rule 913.h.(1).

Compliant with Rule 913.h.(2).

Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? No

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Reclamation will be in accordance with ECMC 1000 Series Rules.

Is the described reclamation complete? Yes _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 05/03/2023

Proposed date of completion of Reclamation. 12/31/2026

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 01/03/2023

Actual Spill or Release date, or date of discovery. _____

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 05/03/2023

Proposed site investigation commencement. 05/03/2023

Proposed completion of site investigation. 06/30/2026

REMEDIAL ACTION DATES

Proposed start date of Remediation. 06/30/2026

Proposed date of completion of Remediation. 12/31/2026

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

The implementation schedule has been changed pending the completion of the supplemental site investigation (SSI) at the Sitzman 27-8 wellhead and flowline. The proposed site investigation is estimated to be completed between January 20, 2026 and April 30, 2026 but cannot be determined until landowner approval for access is finalized.

OPERATOR COMMENT

This 1Q2026 Supplemental Form 27 submittal for Sitzman 27-8 serves as a quarterly update.

Pursuant to ECMC Rule 911 a site investigation was conducted pertaining to the SITZMAN 27-08 wellhead cut and cap and flowline removal. The wellhead was cut and capped on 5 May 2023. On 8 May 2023, five grab soil samples were field screened at the former wellhead and in the N-E-S-W directions, with one soil sample collected at the former wellhead submitted to a certified laboratory for analysis of ECMC Table 915-1 organic compounds, EC, SAR, pH and boron. No exceedances were reported.

Approximately 182' of flowline was removed on 20 June 2023. On 15 November 2023, three soil samples were field screened along the former flowline with one soil sample collected at the terminus of the flowline submitted to a certified laboratory for analysis of ECMC Table 915-1 organic compounds, EC, SAR, pH and boron. No exceedances were reported.

Operator recommends confirmation soil sampling near the wellhead at 6 ft bgs and in the N-E-S-W directions at 5 ft bgs and analyzed for the full ECMC Table 915-1 list of analytes. Operator also recommends soil sampling at the endpoint of the removed portion of the flowline and at the flowline terminus at the separator at 4 ft bgs and analyzed for the full ECMC Table 915-1 list of analytes. Background samples will be obtained sufficiently away from impacted areas to reflect conditions not impacted by oil and gas activities and from similar depths and soil horizons or lithologic materials for comparison to confirmation soil samples. Background samples will be analyzed for ECMC Table 915-1 SSR parameters and metals. Proposed sample map is attached as part of this submission.

Pursuant to Rule 913.e, quarterly reporting will continue for the location until data indicates no further action is warranted.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
