Environmental

Spill/Remediation:

Comment: This is a follow up environmental inspection for Spill ID 480894 and Remediation Project 21723. At the time of inspection an open excavation was present on the south side of the tank battery within the secondary containment. Impacted soils were visible at the base of the three tanks located within the containment area along the south and north side of the tanks. In addition, impacted soils were observed along a low-lying area in the northwest quadrant of the secondary containment. In addition, impacts to soils were observed at the base of the horizontal separator.

Spill Remediation for Spill Facility ID, Remediation Project # 21723 had been ongoing since 06/07/2021. Operator shall provide a detailed standalone implementation schedule for the continued remediation of Rem Project # 21723 in the next Supplemental Form 27-S submission due on 3/05/2026.

In addition, Operator shall define the vertical and lateral extent of impacts to soil. Additional sampling is required to fully delineate the vertical and lateral impacts to soil

Operator shall collect confirmation soil samples for Full Table 915-1 Contaminants of Concern

Spill Facility ID occurred on 06/07/2021 and was reported in Initial Form 19-I document no. 402830414. Initial Form 27-I document no. 402931023 was received on 01/21/2022 transferring the remediation of Spill Facility ID 480894 to Remediation Project no. 21723.

Operator shall continue Spill Remediation in accordance with Rule 913..

Corrective Action: Operator shall continue quarterly reporting until the site investigation is complete and Full Table 915-1 standards are met within the remediation area

Date: 03/05/2026

The next quarterly report is due March 5, 2026
