Comment:

Operator did not respond to the previous Field Inspection Report dated 06/14/2024, and the issues noted in that inspection remain. This location does not comply with Rule 1004. During this inspection, Staff observed that the access road does not appear to have been reclaimed, and the presence of undesirable vegetation (CO List C Noxious Weed- cheatgrass) was observed to be growing throughout. The location is not progressing towards Rule 1004 standards, with bare areas and less than eighty (80) percent. Refer to the attached inspection photos.

Corrective Action:

Comply with Rule 1004. Reclaim access road and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with a total perennial, non-invasive, uniform plant cover of at least eighty (80) percent of the reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management. Corrective action date is the date the location was observed out of compliance.
